

IT Essentials Practise Question

Final Exam Chapter 1-14

Issued date : 22-Jun-2024

Prepared by : Ins. Savon

1. When a new motherboard is being installed, between which two components must thermal compound be applied? (Choose two.)

- a. CPU
- b. RAM
- c. chassis
- d. heat sink
- e. chipset
- f. motherboard

2. What two motherboard components control the system boot operations? (Choose two.)

- a. BIOS chip
- b. UEFI chip
- c. Northbridge chip
- d. Southbridge chip
- e. CPU

3. A network technician suspects that there may be a short or a termination error in the wiring that connects an Ethernet switch to the network. Which tool would be the best choice for the technician to use to identify the issue?

- a. loopback adapter
- b. tone generator and probe
- c. cable tester
- d. multimeter

4. A customer has requested that a PC be built that will support eSATA. Which component should be checked to be sure that this feature is supported?

- a. CPU
- b. chipset
- c. hard disk
- d. RAM module

5. Which memory module used to hold instructions for booting a PC and loading the OS, but is still used on adapters even though the memory contents cannot be changed?

- a. RAM
- b. ROM
- c. cache
- d. main memory

6. A user wants to synchronize some apps, movies, music, and ebooks between mobile devices. What are the two types of connections used to synchronize this type of data? (Choose two.)

- a. cellular
- b. Wi-Fi
- c. USB
- d. Bluetooth
- e. NFC

7. A color laser printer is used to print documents with graphics and photographs. Users are complaining that printing takes too long. Which component of the printer should be upgraded in order to improve printing performance?

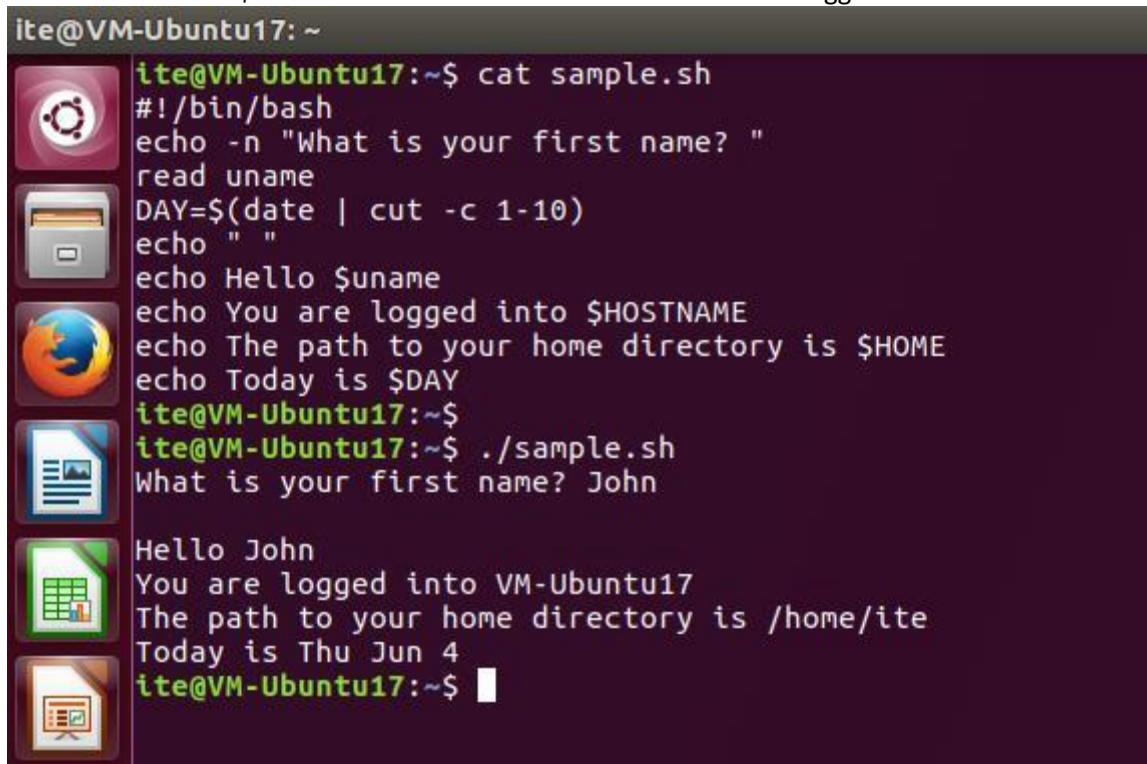

- a. CPU
- b. RAM
- c. hard drive
- d. toner cartridges

8. Which Cloud computing service would be best for an organization that needs to collaboratively create applications and deliver them over the web?

- a. PaaS
- b. IaaS
- c. SaaS
- d. ITaaS

9. Refer to the exhibit. Examine both the output and the source code of the Linux shell script sample.sh. Which two statements describe the variables contained in the sample.sh script? (Choose two.)

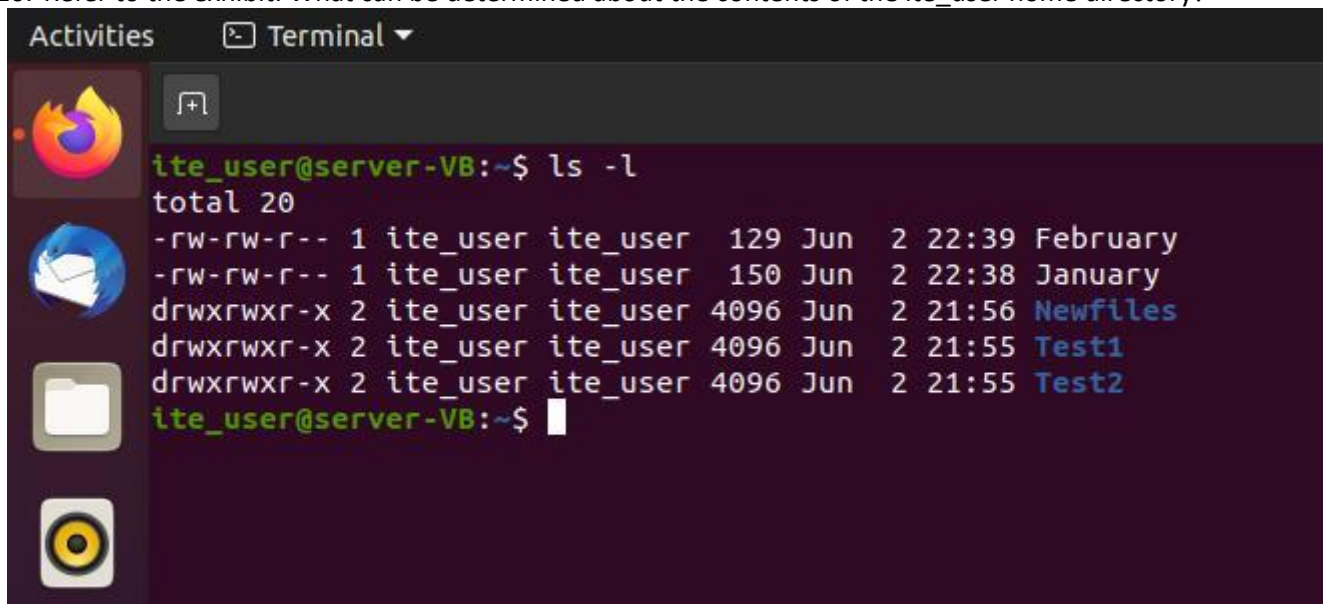

- a. The \$HOSTNAME variable is defined within the script.
- b. The \$uname variable is an input variable defined within the script.
- c. The \$DAY variable is a standard environmental variable in Linux.
- d. The value of the \$HOME variable is the same for all logged in users.
- e. The \$HOSTNAME variable is an environmental variable initialized by the system.
- f. The \$uname variable contains the username of the logged in user.

```
ite@VM-Ubuntu17: ~
ite@VM-Ubuntu17:~$ cat sample.sh
#!/bin/bash
echo -n "What is your first name? "
read uname
DAY=$(date | cut -c 1-10)
echo " "
echo Hello $uname
echo You are logged into $HOSTNAME
echo The path to your home directory is $HOME
echo Today is $DAY
ite@VM-Ubuntu17:~$
ite@VM-Ubuntu17:~$ ./sample.sh
What is your first name? John

Hello John
You are logged into VM-Ubuntu17
The path to your home directory is /home/ite
Today is Thu Jun 4
ite@VM-Ubuntu17:~$
```

10. Refer to the exhibit. What can be determined about the contents of the ite_user home directory?

```
Activities Terminal
ite_user@server-VB:~$ ls -l
total 20
-rw-rw-r-- 1 ite_user ite_user 129 Jun 2 22:39 February
-rw-rw-r-- 1 ite_user ite_user 150 Jun 2 22:38 January
drwxrwxr-x 2 ite_user ite_user 4096 Jun 2 21:56 Newfiles
drwxrwxr-x 2 ite_user ite_user 4096 Jun 2 21:55 Test1
drwxrwxr-x 2 ite_user ite_user 4096 Jun 2 21:55 Test2
ite_user@server-VB:~$
```

- a. The octal representation of the permissions for January is 755.
- b. All users have read, write, and execute permissions to files within the directories.
- c. There are two data files and three directories contained in this user directory.
- d. The data files in this user directory contain no data.

11. Which two tools are available to transfer user data and settings from an old Windows computer to a Windows operating system on a new computer? (Choose two.)

- a. Windows Easy Transfer
- b. Windows User Manager
- c. Windows Upgrade Assistant
- d. Windows Upgrade Advisor
- e. User State Migration tool

12. Which subject area describes collecting and analyzing data from computer systems, networks, and storage devices, as part of an investigation of alleged illegal activity?
- cyber law
 - computer forensics**
 - cryptography
 - disaster recovery
13. A technician suspects that a security issue is causing problems with a computer. What two actions could be performed to test theories of probable cause when troubleshooting the PC? (Choose two.)
- Log in as a different user.**
 - Disconnect the computer from the network.**
 - Search helpdesk repair logs for more information.
 - Discuss solutions with the customer.
 - Ask the customer open-ended questions about the problem.
14. What is the purpose of RAID adapters?
- to allow older PCI technology expansion slots to be used
 - to provide enhanced audio and graphic capabilities
 - to connect multiple storage devices for redundancy or speed**
 - to connect peripheral devices to a PC to improve performance
15. A data center has recently updated a physical server to host multiple operating systems on a single CPU. The data center can now provide each customer with a separate web server without having to allocate an actual discrete server for each customer. What is the networking trend that is being implemented by the data center in this situation?
- BYOD
 - virtualization**
 - maintaining communication integrity
 - online collaboration
16. Which type of network spans a single building or campus and provides services and applications to people within a common organizational structure?
- PAN
 - WAN
 - LAN**
 - MAN
17. Which methods can be used to implement multifactor authentication?
- VPNs and VLANs
 - IDS and IPS
 - passwords and fingerprints**
 - tokens and hashes
18. A technician is upgrading many PCs used within the company. How should the technician dispose of old RAM?
- Recycle following local regulations.**
 - Take it to the garbage dump.
 - Burn it.
 - Destroy it with a hammer.
19. What ACPI power state describes when the computer is off?
- S5**
 - S2
 - S3
 - S1
20. A client packet is received by a server. The packet has a destination port number of 443. What service application is the client requesting?
- HTTPS**
 - SSH
 - Telnet
 - SMTP
21. Users in a company have complained about network performance. After investigation, the IT staff has determined that the DNS server was sent with an enormous amount of false requests, thus overwhelming the server. What is the type of network attack?
- DoS**
 - SYN flood
 - zero-day
 - DNS poisoning

22. What two effects might suggest that an incorrect printer driver is loaded on the Windows PC? (Choose two.)
- a. The printer does not print a test page.
 - b. Toner is smearing or rubbing off the page.
 - c. The printer is printing unknown characters.
 - d. Print jobs appear in the print queue, but are not printed.
 - e. Paper jams are occurring frequently.
23. Why would a network technician change the wireless router IP address to a different private IP address during initial installation?
- a. to limit the number of devices and users that can attach to the wireless network
 - b. to enable the router to become the DHCP server for the network and to perform NAT
 - c. to strengthen the network mode login security and encryption settings
 - d. to ensure that users will have to manually configure the network name in their wireless clients
 - e. to decrease the likelihood that someone could access the router using the default settings
24. What three values must be added to the IPv4 properties of a NIC in order for a computer to have basic connectivity with the network? (Choose three.)
- a. subnet mask
 - b. DHCP server address
 - c. domain name
 - d. default gateway
 - e. speed and duplex
 - f. IP address
25. A technician is explaining the differences between inkjet printers and laser printers to a customer. Which two comparisons should the technician make? (Choose two.)
- a. Inkjet printers are less expensive as an initial purchase than laser printers.
 - b. A laser printer is significantly slower than an inkjet printer.
 - c. Both laser and inkjet printers produce poor quality images.
 - d. The laser printer output is dry after printing, but an inkjet printer may still have wet ink on the paper after printing.
 - e. Inkjet printers use plain paper to make economical prints, but laser printers require more expensive thermal paper.
26. Which is the compressed format of the IPv6 address 2001:0db8:0000:0000:a0b0:0008:0001?
- a. 2001:db8::a0b0:8:1
 - b. 2001:db80:0:1::80:1
 - c. 2001:db8::ab8:1:0:1000
 - d. 2001:db80:::1::80:1
27. A school is installing a new shared printer but the printer is not showing up on the list of available printers. What should the technician do to resolve the issue?
- a. Manually add the printer IP address.
 - b. Reset the page counter.
 - c. Connect the printer using wireless.
 - d. Install a USB hub.
 - e. Update the BIOS.
28. A user reports that a drive is no longer there. The technician asks the user to demonstrate the problem. Within the application, the user demonstrates that the drive, that was present in the save options yesterday, is now no longer an option. What should the technician do to see if the drive is recognized by the operating system?
- a. Use Device Manager.
 - b. Check the Startup folder.
 - c. Bring up a command prompt and type ipconfig.
 - d. Swap the data cables of the mechanical drive and the SSD.
29. What is used to control illegal use of software and content?
- a. chain of custody
 - b. service level agreement
 - c. End User License Agreement
 - d. digital rights management

30. When responding to a call from a customer who is experiencing problems with a computer, the technician notices that a number of system files on the computer have been renamed. Which two possible solutions could the technician implement to resolve the problem? (Choose two.)
- a. Use antivirus software to remove a virus.
 - b. Restore the computer from a backup.
 - c. Change the folder and file permissions of the user.
 - d. Reset the password of the user.
 - e. Upgrade the file encryption protocol
31. An employee that has worked at the company for many years has started a home-based business selling crafts. While leaving an office meeting, a company supervisor notices the employee buying supplies for the personal crafting business of the employee. What section of the security policy should the supervisor review when determining how to handle this situation?
- a. acceptable use policies
 - b. identification and authentication policies
 - c. incident handling policies
 - d. remote access policies
32. What are three features of GPS on mobile devices? (Choose three.)
- a. phone number lookup
 - b. navigation
 - c. specialized search results
 - d. device tracking
 - e. remote wipe
 - f. gas mileage calculation
33. Which three components are used to assign file and directory permissions in Linux systems? (Choose three.)
- a. root
 - b. group
 - c. owner
 - d. all users
 - e. super group
 - f. admin group
34. What is a characteristic of the open source license of an application software?
- a. It requires registration instead of purchasing.
 - b. It cannot be used for campus-wide deployment.
 - c. It allows users to modify and share the source code.
 - d. It does not require purchase in order to use the software.
 - e. It requires acknowledged completion of a professional training course prior to use
35. What two actions should a call center technician avoid when dealing with an angry customer? (Choose two.)
- a. spending time explaining what caused the problem
 - b. putting the customer on hold or transferring the call
 - c. apologizing for any inconvenience caused to the customer
 - d. sympathizing with the customer
 - e. letting the customer explain the problem without interruption
36. Which type of documentation is concerned with specifying what data must be collected and how long it must be retained in regards to an organization?
- a. policies
 - b. operations
 - c. projects
 - d. user documentation
37. A user notices that files created and saved locally last week are missing and asks the technician to investigate. The technician suspects there has been a security breach. Which type of malware could be responsible?
- a. adware
 - b. phishing
 - c. spyware
 - d. Trojan

38. A technician has been asked by a manager to recommend a security solution for protecting a computer against ransomware. Which security technique should the technician recommend?
- a. antimalware
 - b. encryption
 - c. ping sweep
 - d. IPS
39. What technology allows users to access data anywhere and at any time?
- a. data analytics
 - b. Cloud computing
 - c. virtualization
 - d. micromarketing
40. Which cloud model provides services for a specific organization or entity?
- a. a hybrid cloud
 - b. a community cloud
 - c. a public cloud
 - d. a private cloud
41. Which two types of data should be backed up before troubleshooting a computer for a customer? (Choose two.)
- a. BIOS system file
 - b. driver files for the hard disk
 - c. Internet Explorer favourite files
 - d. Windows operating system files
 - e. documents that are created by the customer
42. During what step in the troubleshooting process does the technician demonstrate to the customer how the solution corrected the problem?
- a. Verify full system functionality.
 - b. Establish a plan of action to resolve the problem.
 - c. Document the findings, actions, and outcomes.
 - d. Establish a theory of probable cause.
43. A technician is attempting to diagnose and rectify a common boot problem on a Windows 10 installation. Which Windows 10 advanced recovery option should the technician use?
- a. System Restore
 - b. System Image Recovery
 - c. Reset
 - d. Startup Repair
44. A client packet is received by a server. The packet has a destination port number of 22. What service application is the client requesting?
- a. SMB/CIFS
 - b. HTTPS
 - c. SLP
 - d. SSH
45. Why would a technician need to use the tasklist command?
- a. to display a list of current processes running on a local or a remote computer
 - b. to create a new Windows directory
 - c. to remove an empty directory
 - d. to change from the current working folder to another folder

Good Luck.....
