

Course “Object-Oriented Programming in C++”**Week №5*****Homework*****Exercise 1.**

Add a move constructor and move assignment operator to an existing class *String*.

Exercise 2.

Add a move constructor and move assignment operator to an existing class *Array*.

Exercise 3.

Implement the class *Array* by replacement the overloading operators with overloading friend operators, where it's possible. In addition, implement (using a friend overloading) the following situation:

- Number + object_class.
