

Course “Object-Oriented Programming in C++”**Week №6*****Homework*****Exercise 1.**

Write a program that implements the card game Black Jack on the base of classes.

Exercise 2.

Write a class that implements the work with complex numbers. You must implement a count of the number of class objects (using a static class member variable), as well as a static function, which shows the number of objects.

Exercise 3.

Implement the class "Smart pointer" and code for testing this class.
