Exercise_2

```
// Find the smaller of two numbers
```

```
#define MIN(a, b) ((a) < (b) ? (a) : (b))
```

```
// Find the larger of two numbers
```

```
#define MAX(a, b) ((a) > (b) ? (a) : (b))
```

```
// Raise a number to the second power
```

```
#define SQUARE(x) ((x) * (x))
```

```
// Raise a number to a power (exponentiation)
```

```
#define POWER(base, exp) ({ \  
    typeof(base) result = 1; \  
    for (typeof(exp) i = 0; i < (exp); i++) { \  
        result *= (base); \  
    } \  
    result; \  
})
```

```
// Check whether a given number is even
```

```
#define IS_EVEN(x) ((x) % 2 == 0)
```

```
// Check whether a given number is odd
```

```
#define IS_ODD(x) ((x) % 2 != 0)
```
